The 2nd New Century Harp Competition aims to inspire musicians, especially harp performers, to arrange and compose music for folk harp, and to encourage previously unpublished arrangers and composers.

Entries must be original arrangements of melodies in the public domain or original compositions. There is a wealth of music out there waiting to be arranged for the harp, and many harp players are composing original music.

There will be ten winners who will have their music included in a new book by Afghan Press, to be published in the summer of 2008.

#### Nine - \$220 Merit Prizes
